

ADVANCED PERIMETER SYSTEMS

MULTISYS SECURITY MANAGEMENT

Multisys® is a unique, user friendly, modular PC based Security Management System. It uses a common communication protocol to integrate and control the APS Electro-Fence controllers, Flexiguard analyzers and third party alarm devices.

LOCALLY CONTROLLED

BENEFITS

- Easy to Program and Operate
- Unique User Name and Password Assigned to User
- Each Zone can be Viewed on Screen
- Fence Voltage can Monitored in Real Time on Screen

LOG FILE

All system activity is recorded and stored in a log file. Alarm activity and everything the operator does is recorded. In the event of an incident the files can be searched to find out exactly what occurred.

COMMUNICATION

The various modules connected to the Multisys PC communicate using a perpetual protocol by RS485. The data can be sent by copper data cables, fibre optic cables, radio transmitter or microwave link.

SET UP

The system is easy to set up using intuitive drop down menus for each item. Alarms actions can be linked with various outputs to trigger other devices, e.g switch on lights or activate sirens.

SPECIFICATIONS

PC REQUIREMENT

Windows 10 or later, no moving parts PC. Ask us for a recommendation.

COMPATIBLE HARDWARE

Any Electro Fence energisers
Flexiguard FS30X Series
Warehouse Guard
MS200 Alarm control panel

SECURITY

USB Hardware Dongle

MODULARITY

Controls up to 508 connected modules on the data line + as many third party outputs as you need through dedicated I/O modules

COMMS

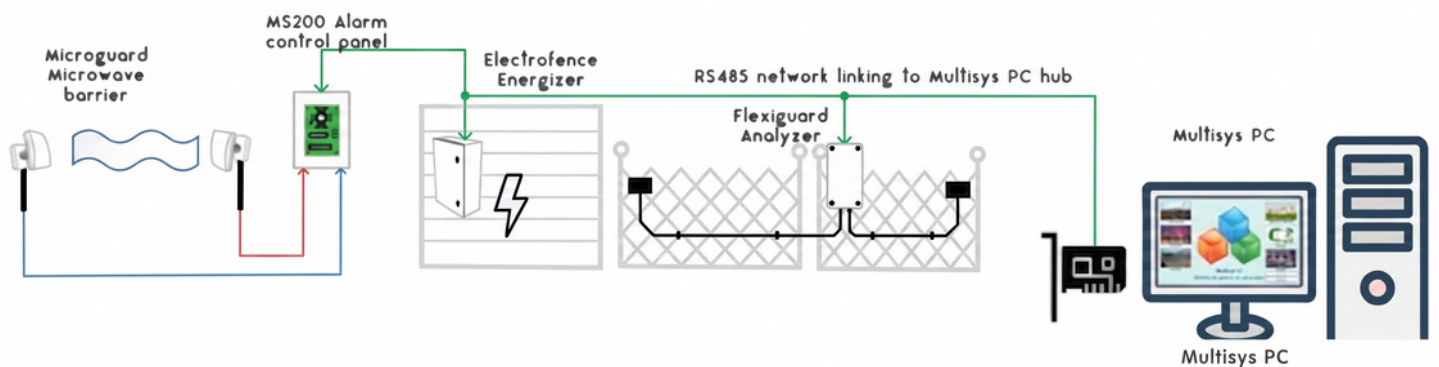

Perpetual RS485

ACCESS

Secure Users login, no limit to number, variable permissions

SYSTEM LOGGING

Log file to record all system activity

TRAINING AND INSTALLATION

**WE OFFER TRAINING TO ENABLE YOUR TEAM TO
INSTALL THE SOLUTION INDEPENDENTLY.
ALTERNATIVELY, WE HAVE A GLOBAL NETWORK
OF TRUSTED INSTALLERS WHO CAN PROVIDE
INSTALLATION SUPPORT WHEREVER YOU NEED IT.**
